

Structherm | Cladding
The Chantry High School
Martley, Worcestershire

Sector: Education
Refurbishment

Client:
Worcestershire County Council

Building type:
ROSLA

Project Size:
1 Teaching Block

Product:
Structural Cladding & Render

Background:

The ICT & Drama block at The Chantry School in Worcestershire was built in the early 1970's for the raising of the school leaving age, hence ROSLA.

This teaching block had deteriorated into a very poor state, with the external timber curtain walling in extremely poor condition and the windows of the block had been screwed up, restricting ventilation. This did not provide the kind of teaching environment expected in the 21st Century.

Solution:

Cost effectiveness was a deciding factor in selecting the structural insulated cladding system for the upgrading of the building, and the ability to reduce the window openings requested by the school for IT requirements.

Testimonial:

"Worcestershire County council and The Chantry High School, Martley, chose the Structherm system of renewal of the cladding of a 30-year old teaching block to give it a new lease of life and bring the building up to 21st Century standards. The teachers and pupils are delighted with the outcome."

John Knight, Building Surveyor
Worcestershire County Council
