

# Structherm renders and finishes

# Italian

# Style

The Structerm Italian renders and finishes are suitable for a range of different projects, from adding a touch of contemporary style to a new-build project, to refurbishing older buildings that are in need of some TLC.

## R&D

Continuous research and development ensures that the performance of the product consistently meets the demands of the modern environment; from UV and pollution resisting technology to self-cleaning finishes.

## Colour

The in-house tinting system enables an infinite number of colours to be supplied to provide you with complete flexibility of design. However there are also 120 standard

colours available if your project is less demanding. The tinting system uses state of the art technology to guarantee consistency of any hue produced.

## Service

Throughout the duration of each project, Structerm offers a thoroughly integrated, customer-oriented service backed by an individual quality assurance procedure.

The quality assurance procedure is supported by:

- Structerm's continually updated professional indemnity insurance
- Product guarantee insurance
- The exclusive use of

Approved Application Contractors

- BBA Certification.

For your peace of mind, all applicators of Structerm products are required to complete both theoretical and practical training in contemporary and historical methods of rendering and finishing before undertaking any work.

The Italian finishes range:

Acrylic		
Extra quartz		Smooth water paint coating with quartz grains
Fless-coat Superfine		Fine quartz micro-coating
Fless-coat Taormina		Close textured smooth floated coating
Fless-coat Cortina Fibro		Open textured fibre reinforced coating
Fless-coat Cortina Fine		Fine textured coating with quartz powders/marble grains
Fless-coat Cortina Normale		Medium textured coating with quartz powders/marble grains
Fless-coat Tonachino		Fibre reinforced coating with the appearance of plaster
Fless-coat Bucciato GS		Medium textured quartz coating with orange peel effect
Fless-coat Special		Fine textured quartz coating with orange peel effect
Fless-coat Graffiato Fine		Fine scratched surface with quartz grains
Fless-coat Graffiato Normale		Medium textured scratched surface with quartz grains
Riv-oland Venezia Naturale		Fine textured with natural marble for antique Venetian effect
Riv-oland Venezia Special		Fine textured with coloured marble for antique Venetian effect
Riv-oland P		Multicoloured small size marble chip coating
Riv-oland M		Multicoloured medium size marble chip coating
Venezia Nova		Fine grained coating with the appearance of plaster

Silicate		
Silissetef L		Smooth, permeable paint
Silissetef R		Smooth coating
Silissetef G		Rough cast coating
Silissetef Eco		Smooth, permeable water paint
Silissetef Antico		Fibre reinforced fine plaster finish

Siloxane		
Ancorall L		Water-repellent, permeable, matt micro-coating
Ancorall R		Smooth texture, water-repellent, permeable coating
Ancorall G		Rough-cast, water repellent, permeable coating
Ancorall Decor		Fibre reinforced fine coating with the appearance of plaster

For a sample of any of the above finishes please call 0800 0407460.

## The Renders

A render is a basecoat upon which a variety of other finishes or finishing coats may be applied. There are 4 types of rendered basecoat available:

- Standard
- Fibre reinforced
- Polymer modified
- Lightweight.

The first two are described as traditional basecoats.

All basecoats are manufactured from natural limestone and are supplied dry in 25kg bags.

The choice of basecoat is determined by the type of building effect or treatment required.

## Other finishes

In addition to the Italian range of finishes, Structherm also provide a more traditional range which consists of:

- Ashlar effect
- Macerend (a brick effect render system)
- Coloured dash receiver with applied coloured dashing aggregate finish

A comprehensive swatch of colours and textures for the dash receiver are available on

request. For Macerend finishes, Structherm is able to closely match existing brickwork when supplied with a sample.

All of the renders and finishes in this brochure are able to be used with other Structherm systems such as:

- Structherm structural cladding
- Structherm insulated render
- Structherm Fastbuild™
