

# Structherm Multirend

A new multistock brick effect render finish allowing accurate colour and texture matching to most multistock bricks.

## System Benefits

- Ideal for residential housing refurbishment projects where standard monochrome brick effect render does not suit the local area.
- Match to most multistock bricks by changing the colour of the mortar and top coat render.
- Multirend dye applied to top coat to achieve multistock effect.

Example of how effective Multirend can be made to look

Multirend dye being applied to create multistock effect
